SYLEX
ERGONOMICS

Namasté

People are different; they have different bodies, different needs and different uses. Whatever type of person you are, we are sure that you will find your perfect chair partner in these pages. Like people, chairs are different too; shape, movement, style, colour, and size all contribute to whether or not a chair will suit an individual. If you think about who you are and what you do selecting a chair can be easy, but if you are not sure, try a few chairs with our no obligation trial.

Sylex Ergonomics has been making and supplying specialised ergonomic products for the Australian and New Zealand marketplace since the 1970's. With warehouses and sales offices across Australia and NZ and a dealer network that services every corner of the territory we are ready and able to serve you.

We are foundation members of the professional bodies in our industry; the Commercial Furniture Industry Association of Australasia and the Australasian Furniture Research and Development Institute. We are Australian Government Endorsed Suppliers.

All chairs are available for 14 day no obligation trial. If after trying the chair you are not completely satisfied return the chair to us in original packaging for a credit.

Every body is different and in Australasia that is especially true.

Biologists who study human measurements (anthropometrics) tell us that our diverse ethnic backgrounds combined with a rich lifestyle have led to one of the world's largest variances in body size, shape, weight and proportion. It is this anthropometric data which is the starting point for designing a great range of seating. It tells us that, no matter how adjustable an office chair is that there is no such thing as a "one size fits all" solution.

In addition to differences in body shapes, studies in biomechanics (how we move) and ergonomics (how we work) show that we have different needs in terms of movement at work.

In most workplaces in Australia and New Zealand the importance of these issues is now well understood. Yet curiously up to date there has been little detailed information available to consumers about how to put these principles into action.

This catalogue aims to redress that situation by providing users with unashamedly technical details about their seating purchases. It gets under the bonnet of chair manufacture to tell you why a particular chair could be the right choice for you.

If you would like some help or further advice talk to our trained seating professionals. They really know their stuff when it comes to ergonomics and people's needs. Your suggestions or questions are welcomed. If you do not see exactly what you want within these pages talk to us about customizing a product for you.

Welcome to the science of great ergonomic seating design and please take a seat.

Prices.

We reserve the right to change prices without notice. For a firm quotation contact your local sales office.

Fabric. It's Your Choice.

Chairs come in standard fabrics and finishes as shown, but most products can be customised with your own fabric choices. Prices and lead times are subject to quotation. Please note that the printing process cannot always faithfully reproduce fabric colours. Futhermore fabrics can exhibit minor variances between dye lots.

Warranty.

All products herein carry 5 years manufacturer's warranty against faulty parts or workmanship. Product purchases must be registered at the Sylex Ergonomics website.

Freight.

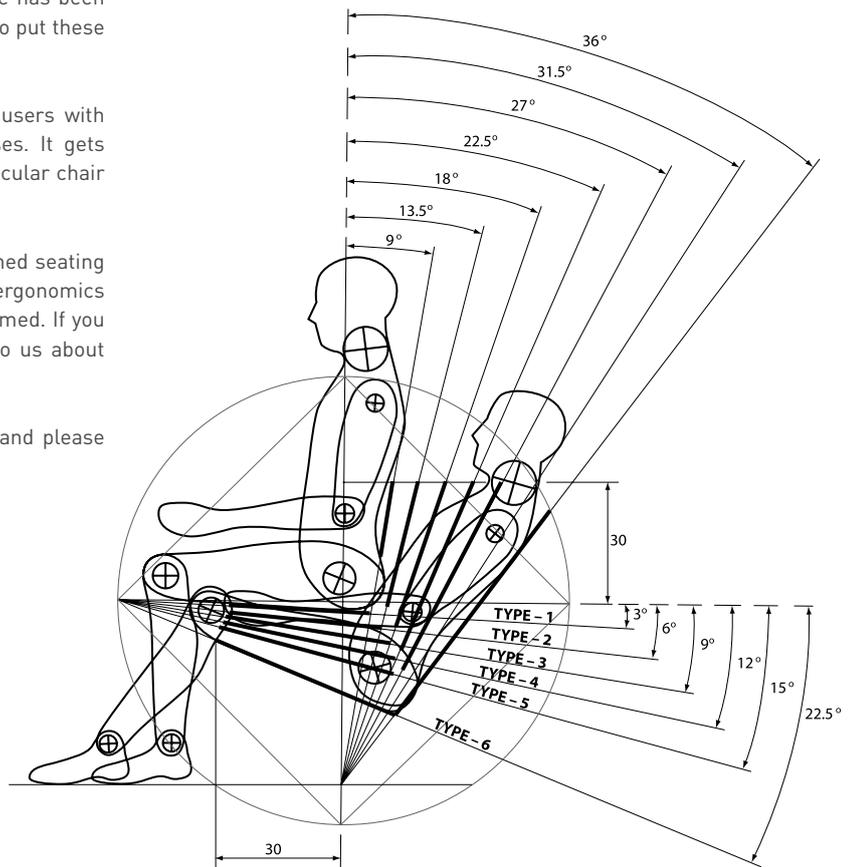

In Brisbane, Melbourne, Perth and Sydney metro areas, chairs are usually shipped fully assembled unless otherwise specifi ed. In other areas chairs assembly required. Freight cost varies by quantity and destination.

In Auckland chairs are usually shipped cartonised but can be assembled prior to despatch on request.

In this collection of fine seating we have greatly enhanced the concept of families of chairs, allowing you to select one range tofi t out your entire office with a consistent, coordinated or professional image.

Australian and New Zealand Standards.

Chairs have been selected to broadly comply with the dimensions and functions of the relevant ANZ Standards ANZS 4438:1997 for height adjustable chairs and ANZS 4688:2000 for fixed seating. If proven compliance with accepted standards is essential to your organisation select chairs tested by the Australasian Furniture Research and Development Institute (AFRDI). See page 7. Test reports available on application. All dimensions cited in this catalogue are made in accordance with the above standards.
